

Category	Sub-category	Data type	Data sub-type	Used for	retained for at this moment	proposed to be implemented	Progress	
Application	I tar	device_id	auto-generated unique id, permanent per installation	associate a device with a session and their settings, like language	until removal requested/until the application get's re-installed	N/A		
		push token	Apple or Google push token	to send notification to the user	until removal requested	until expire on no user activity (proposed expiration time 30 days)		
		language	the user's application language	to offer information and send notification in user's language	until removal requested	until expire on no user activity (proposed expiration time 30 days)		
		currency	currency	N/A	until removal requested	N/A		
		country	country	N/A	until removal requested	N/A		
		notification preference	type and time interval for notifications	to know what kind of notifications and when to send to the user	N/A	until expire on no user activity (proposed expiration time 30 days)		
		Service list	Remote IP	N/A	N/A	N/A		
		Content download	Remote IP	statistics / abuse detection	30 days, after only in anonymized statistics	30 days, after only in anonymized statistics		
		Online search requests	anonymous search parameters: Search base location coordinates, Search string, Search user preferences	debug, unit /stress testing & statistics	365 days	365 days	Done	
		Online route requests	anonymous routing parameters: Waypoints coordinates, Route user preferences, Route parameters	debug, unit /stress testing & statistics	365 days	365 days	Done	
		Traffic signs	anonymous data: Sign coordinates, Sing info (size, etc) + image	N/D	N/D	N/D		
		Traffic data upload	anonymous data: random sensor_id changing every 6 hours, GPS coordinates, GPS altitude, azimuth, speed, speedunit, timestamp	statistics + combining with external traffic sources to calculate jams	N/D	N/D		
		Geographic area data request	Remote IP Map area's ids list	N/A Display geographically located data: map, sat images, elevation, public transit, traffic, safety, weather, wiki				
		Routing request	Remote IP Waypoints geographic location Routing preferences	N/A Calculate a route between waypoints	N/A	N/A		
		Search request	Remote IP Search reference geographic position Search preferences	N/A Search geographically located objects				
		Resource update	Remote IP Installed app resources hash codes	N/A Update app resources mechanism				
		Set Alert (Fancing)	email address Destination email address Message on arrival message on departure	to send event email	until removal requested	until the message is sent		
		Optional crash dumps	app version device type os type & version hash of device_id app path (phone & sdcard)	to group the crash type	N/D	N/D		
		Safety preview	web server access log	Remote IP User Agent Date time of access webpage accessed	pseudo-anonymous, only the IP which can somehow related to the user, Used for: statistics / abuse detection	30 days, after only in anonymized statistics	30 days, after only in anonymized statistics	Done
			preview application log	Remote IP Language Unit id color_scheme	debug to present localized information to the user to present localized information to the user to identify the speedcamera for which the users requested additional details to present the information to the user in correct color scheme	30 days, after the logs are purged	30 days, after the logs are purged	Done. As of today: 2018/05/18 The unneeded parameters was removed
	Weather Preview	web server access log	Remote IP User Agent Date time of access webpage accessed	pseudo-anonymous, only the IP which can somehow related to the user, Used for: statistics / abuse detection	30 days, after only in anonymized statistics	30 days, after only in anonymized statistics	Done	
		preview application log	Remote IP Language Unit id OR Latitude + Longitude of the location clicked on the map color_scheme	debug to present localized information to the user to present localized information to the user to identify the weather station or nearest forecast location for which the users requested additional details to present the information to the user in correct color scheme	30 days, after the logs are purged	30 days, after the logs are purged	Done. As of today: 2018/05/18 The unneeded parameters was removed	
	Traffic preview	preview traffic request	Remote IP Event id Language Colo scheme Unit	N/A to be able to present the requested information in the required language using the correct system units	N/A	N/A	Done	
	Public transit	Public transit request	Remote IP Item id	N/A to be able to present the requested information	N/A	N/A	Done	
	Tips & Tricks	web server access log	Remote IP User Agent Date time of access webpage accessed	pseudo-anonymous, only the IP which can somehow related to the user, Used for: statistics / abuse detection	30 days, after only in anonymized statistics	30 days, after only in anonymized statistics	Done	
	Third Party Licenses	web server access log	Remote IP User Agent Date time of access webpage accessed	pseudo-anonymous, only the IP which can somehow related to the user, Used for: statistics / abuse detection	30 days, after only in anonymized statistics	30 days, after only in anonymized statistics	Done
